

Retail Dataset Visualization Showcase

This retail dataset spans **January through early May 2026** with 1,100 transactions across 3 customers, 20 products, and \$302M in total revenue. Here's a showcase of different visualization types highlighting interesting patterns:

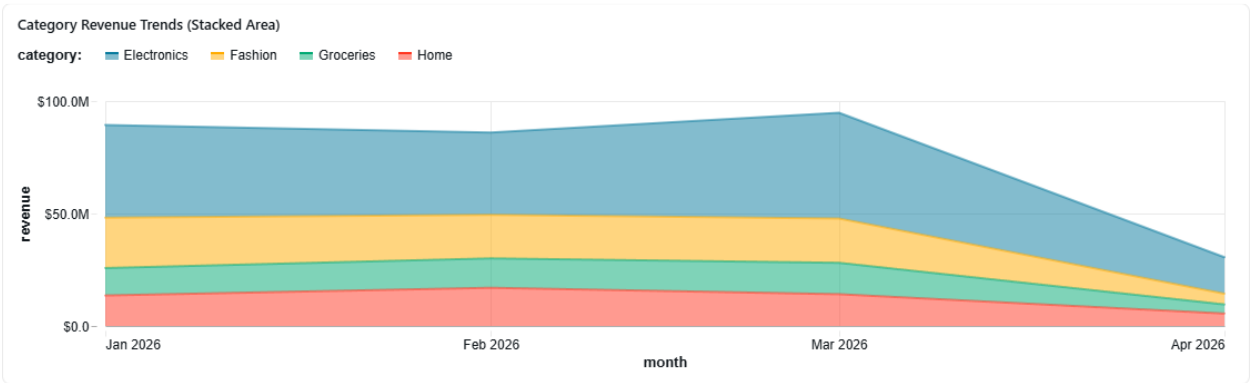

1. Pie Chart: Category Distribution

Electronics dominates the revenue mix at 47%, followed by Fashion (22%), Home (17%), and Groceries (14%).

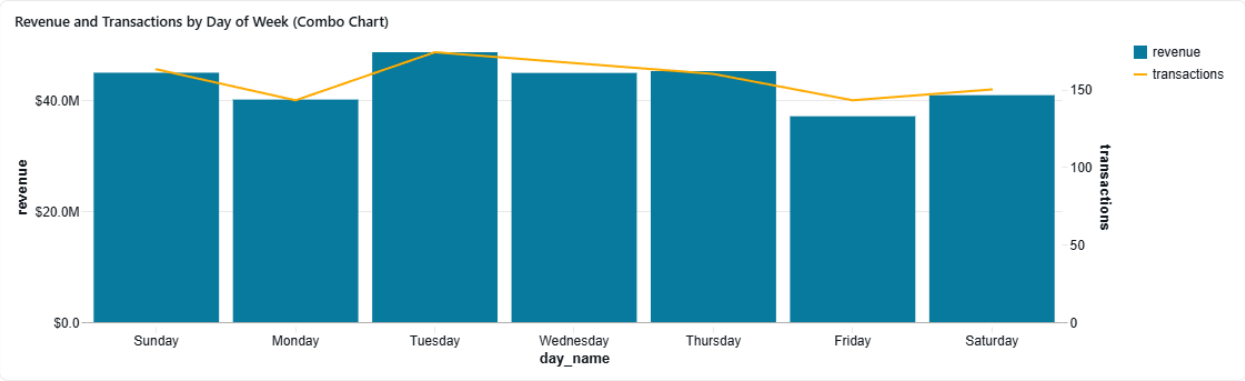

2. Stacked Area Chart: Category Trends Over Time

Electronics shows strong growth from January through March, while other categories remain relatively stable. The sharp drop in April reflects incomplete data (only partial month).

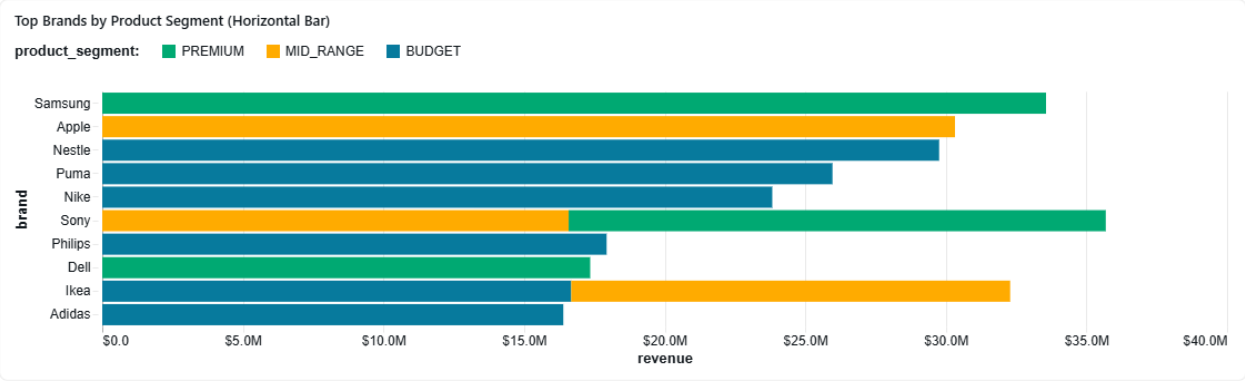

3. Combo Chart: Dual-Axis Analysis

Tuesday leads in both revenue (\$48.7M) and transaction volume (174), while Friday shows the lowest revenue (\$37.1M) despite having 143 transactions. This suggests Fridays have lower average order values.

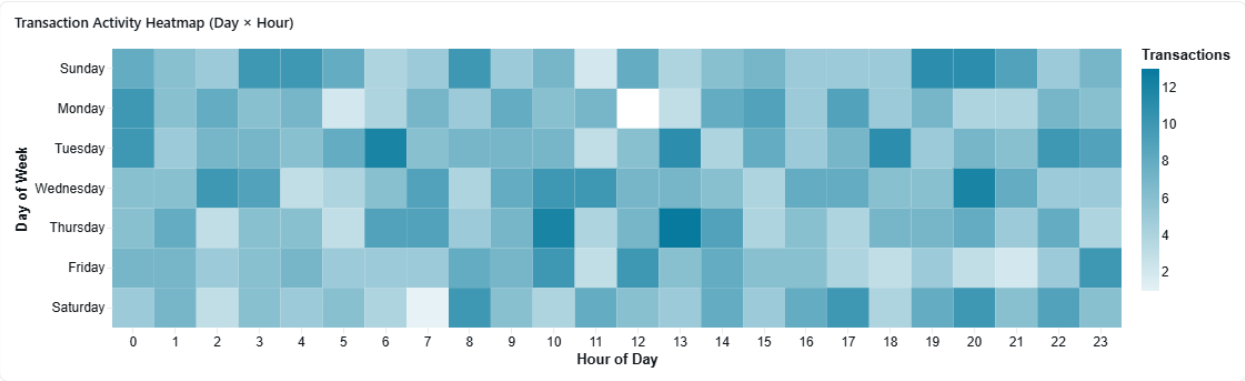

4. Horizontal Bar Chart: Segmented Comparison

Samsung Premium products lead at \$33.6M, followed by Apple Mid-Range at \$30.3M. Budget segment products from Nestle, Puma, and Nike show strong performance, each exceeding \$23M.

5. Heatmap: Transaction Patterns

The heatmap reveals transaction activity across days and hours. Peak activity occurs on Thursday at 1 PM (13 transactions) and Tuesday at 6 AM (12 transactions), showing varied shopping patterns throughout the week.

6. Formatted Table: Top Products

Sony Bravia 55" leads all products with \$19.1M in revenue, followed by Philips Air Fryer (\$17.9M) and Dell XPS 13 (\$17.4M). Electronics products dominate the top 10, with average prices ranging from \$53K to \$66K.

Top 10 Products by Revenue			
Product	Category	Total Revenue	Avg Price
Sony Bravia 55	Electronics	\$19,102,459	\$53,478.19
Philips Air Fryer	Home	\$17,936,745	\$59,214.56
Dell Xps 13	Electronics	\$17,352,941	\$59,406.00
Samsung Smart Tv	Electronics	\$17,062,986	\$57,544.46
Ikea Office Chair	Home	\$16,678,440	\$57,519.37
Sony Headphones	Electronics	\$16,585,932	\$63,661.27
Galaxy S24	Electronics	\$16,500,783	\$66,183.37
Adidas Hoodie	Fashion	\$16,396,616	\$54,255.22

These visualizations demonstrate different chart types for various analytical needs: proportions (pie), trends (area), multi-metric comparisons (combo), rankings (bar), patterns (heatmap), and detailed data (table).
